SUMMARY

Seasoned Product professional with 15+ years of experience leading complex, enterprise-grade digital platforms across fintech, SaaS, global e-commerce, and regulated financial environments. Delivered large-scale modernization initiatives in identity and account management, pricing, subscription billing, quote-to-cash workflows, AI-driven underwriting, and investment servicing systems. Operates at the intersection of architecture, compliance, and business strategy, driving multi-year roadmaps, executive alignment, and data-driven product outcomes using KPIs and A/B testing to improve user experience and business performance.

Key achievements:

- **Namecheap (~\$300M global SaaS platform)**: Led modernization of user management, pricing, and payment services supporting 11M+ users; improved authentication reliability by 30%, reduced payment failure rates by 18%, and strengthened PCI compliance across high-volume global checkout systems; implemented A/B testing for checkout and authentication flows to improve conversion and reduce user friction.
- **On-line Residential (\$1.2M modernization)**: Modernized ERP platform and built CRM platform from scratch, integrating subscription pricing, billing, payments (Stripe, PayPal, ACH), analytics, and multi-tenant financial workflows; improved ROI by 25%; defined and executed A/B tests on pricing models and user flows to optimize conversion and customer retention.
- **DXC Technology (Capital Group)**: Owned \$1M roadmap for SEC/FINRA-regulated investment servicing platforms, leading AWS migration to improve scalability, operational transparency, and audit readiness.

CORE SKILLS

- **Product Ownership**: Product vision, roadmap development, MVP definition, backlog ownership, prioritization, product scaling, go-to-market readiness, stakeholder alignment, data-driven decision-making, A/B testing, experimentation.
- **Domain Expertise**: FinTech, SaaS, global e-commerce, banking, AI decisioning, onboarding, KYC/KYB/KYM, loan processing, CRM, identity, pricing, payments, subscription billing, quote-to-cash, regulated systems.
- **Technical Expertise**: API integrations (Stripe, PayPal, Experian), AWS-based platforms, Salesforce, pricing and decisioning logic, subscription billing systems, data workflows, ERP/CRM modernization, multi-tenant SaaS, cloud migration.
- **Delivery**: Scrum, SAgile, release management, UAT leadership, CI/CD coordination, incident governance, risk management, KPI dashboards, executive communication, cross-functional collaboration.

EXPERIENCE

Plat.AI – Senior Business Analyst

Los Angeles, CA | Jun 2025 – Nov 2025

FinTech • AI Underwriting • Credit Decisioning • Regulatory Compliance

- Defined product requirements for AI-driven underwriting across multiple credit products, including auto loans, translating risk models into clear decisioning workflows.
- Designed and supported integrations between lending systems and external insurance and verification providers to enable automated decisioning and compliance.
- Converted complex underwriting logic into user stories and acceptance criteria for scalable implementation.
- Led API integrations with financial institutions, credit bureaus, and third-party providers, resolving data and workflow issues.
- Collaborated with risk, compliance, and engineering teams to ensure alignment with regulatory and business requirements.

DXC Technology (Project: Capital Group) – Product Owner

Irvine, CA | Jun 2024 – Jun 2025

Financial Services • Investment Servicing • CRM Platforms • Cloud Systems

- Owned roadmap for SEC/FINRA-regulated investment servicing platforms, aligning compliance requirements with scalable cloud architecture.
- Led AWS migration of core servicing systems, improving resilience, scalability, and audit transparency in a regulated environment.
- Built KPI dashboards to provide leadership visibility into operational performance and risk exposure, enabling data-driven prioritization and decision-making.

On-line Residential – Product Manager

New York, NY | May 2019 – Apr 2024

B2B/B2C SaaS • ERP/CRM • Multi-Tenant Billing & Payments

- Modernized a legacy ERP into a scalable SaaS platform, enabling multi-tenant B2B/B2C workflows and accelerating product iteration.
- Built and launched a CRM platform from 0 to 1, defining product structure, core workflows, and leading go-to-market strategy and execution.
- Drove conversion and customer retention by optimizing pricing, onboarding, and payment journeys through data-driven experimentation and A/B testing.
- Improved revenue operations and payment success rates by implementing automated billing, subscription models, and Stripe, PayPal, and ACH integrations.

Namecheap – Product Owner

Phoenix, AZ | Nov 2016 - May 2019

Global SaaS & E-commerce • Identity • Payments • Security

- Improved platform reliability and user experience by redesigning authentication and account management flows, increasing login stability and reducing access-related support tickets.
- Increased conversion rates and reduced user friction through A/B testing and optimization of checkout and authentication experiences based on behavioral data.
- Enhanced scalability and operational efficiency by centralizing user and account management capabilities across web and mobile platforms.
- Improved SLA adherence and reduced production downtime by establishing incident governance practices and strengthening monitoring and reliability processes.

Raiffeisen Bank International – Senior Business Analyst

London, UK | Feb 2013 – Nov 2016

Banking • Consumer Lending • Credit Products • Regulatory Platforms

- Led end-to-end business analysis for auto loan (auto credit) and related insurance workflows, including requirements gathering and as-is/to-be process design.
- Re-engineered credit lifecycle processes across origination, underwriting, and servicing, improving data consistency between lending and insurance flows.
- Defined underwriting logic, eligibility rules, and compliance requirements in collaboration with Risk and Operations.
- Externalized business rules from legacy systems, increasing flexibility and improving regulatory traceability.

PREVIOUS EXPERIENCE

NetFusion (Startup) – Product Manager

New York, NY | Mar 2012 – Feb 2013

- Launched a CRM and e-commerce platform for beauty businesses, defining MVP scope and delivering web, iOS, and Android applications.

PLS Logistics – Senior Business Analyst

PA, USA | Mar 2011 – Feb 2012

- Delivered business and systems analysis for a logistics ERP platform supporting supply chain operations, including B2B shipment tracking, partner workflows, and API integrations.

Iridescent (now Technovation) – Business Analyst

CA, USA | Mar 2009 – Feb 2011

- Led end-to-end business analysis and delivery of a web and mobile LMS for elementary schools, defining requirements and collaborating with stakeholders and engineering to deliver scalable, user-friendly solutions from concept to production launch.
