SUMMARY

Senior Product Manager / Product Owner with extensive experience delivering e-commerce, payments, and subscription platforms across fintech, SaaS, and global products. Proven track record of owning product strategy and driving execution across cross-functional teams (engineering, analytics, design, business). Strong focus on checkout optimization, onboarding, and customer lifecycle (activation, retention, conversion) in regulated environments.

Key achievements:

- **Namecheap (~\$300M global SaaS platform):** Led modernization of user management, pricing, and payment services supporting 11M+ users; improved authentication reliability by 30%, reduced payment failure rates by 18%, and strengthened PCI compliance across high-volume global checkout systems; implemented A/B testing for checkout and authentication flows to improve conversion and reduce user friction.
- **On-line Residential (\$1.2M modernization):** Modernized ERP platform and built CRM platform from scratch, integrating subscription pricing, billing, payments (Stripe, PayPal, ACH), analytics, and multi-tenant financial workflows; improved ROI by 25%; defined and executed A/B tests on pricing models and user flows to optimize conversion and customer retention.

CORE SKILLS

- **Product Ownership:** Product vision, roadmap development, MVP definition, backlog ownership, prioritization, product scaling, go-to-market readiness, stakeholder alignment, data-driven decision-making, A/B testing, experimentation
- **Domains Expertise:** FinTech, SaaS, e-commerce, banking, AI decisioning, onboarding, KYC/KYB/KYM, loan processing, CRM, identity, pricing, payments, subscription billing, regulated systems
- **Commerce & Payments:** Checkout optimization, billing lifecycle, Stripe, PayPal, ACH, PCI compliance
- **Technical Expertise:** API integrations, Zendesk, SQL, AWS, Salesforce, Figma, Balsamiq, Google Analytics, Power BI, Jira, Confluence, Swagger, ERP/CRM modernization, multi-tenant SaaS, cloud migration, mobile (iOS/Android), Salesforce, ServiceNow.
- **Delivery:** Scrum, SAFe, PI Planning, release management, UAT, CI/CD coordination, incident governance, risk management, dependency management, KPI dashboards, executive reporting, cross-functional collaboration

EXPERIENCE

Plat.AI – Senior Business Analyst, Scrum Master | Los Angeles, CA | 2025 – 2025

FinTech • AI Underwriting • Credit Decisioning • Regulatory Compliance

- Defined multi-step decisioning workflows for an AI-driven underwriting platform, translating risk models into scalable system logic, enabling consistent automated approval and decline decisions across auto loan and mortgage products
- Led API integrations with financial institutions and credit bureaus (Experian), managing data exchange and incident resolution, stabilizing automated decisioning workflows and reducing manual intervention
- Facilitated Agile ceremonies and managed Jira configuration, dependencies, and risk tracking, improving delivery predictability across distributed engineering and risk teams
- Built Power BI dashboards for leadership, increasing visibility into delivery progress and decisioning performance
- Coached business analysts on requirements quality and product thinking, improving alignment between business, risk, and engineering teams

BXC Technology (Project: Capital Group) – Product Owner | Irvine, CA | 2024 – 2025

Financial Services • Investment Servicing • CRM Platforms • Cloud Systems

- Led migration of legacy data storage to AWS, improving scalability, resilience, and audit transparency in a SEC/FINRA-regulated environment
- Led CRM migration (marketing and HR workflows) to Salesforce, including as-is analysis, gap analysis, and to-be design
- Built Tableau dashboards and KPI reporting, increasing leadership visibility into delivery progress and production readiness
- Coordinated production incident resolution via ServiceNow, reducing system downtime and improving system stability
- Established Agile delivery processes from scratch, including Jira setup, PI Planning, sprint planning, backlog grooming, and retrospectives
- Facilitated stakeholder demos and requirements sessions with architects and business stakeholders
- Owned product roadmap and aligned cross-functional teams on delivery priorities

On-line Residential – Product Manager | New York, NY | May 2019 – Apr 2024

B2B/B2C SaaS • ERP/CRM • Multi-Tenant Billing & Payments

- Modernized a legacy ERP platform (olr.com), reducing manual effort and improving operational efficiency
- Led development of a CRM platform (linecity.com) from scratch across web and mobile, including go-to-market execution and agent subscription flows
- Delivered key features across both platforms, including AI search, reporting and analytics, IAM, payment integrations (Stripe, PayPal, ACH), and third-party APIs (Google Maps, Mailchimp)
- Owned product strategy, including market analysis, roadmap definition, backlog management, risk and dependency management, A/B testing, and Google Analytics for conversion and retention analysis
- Built Power BI dashboards with KPI reporting for executive visibility and decision-making
- Ensured platform stability during high-volume traffic periods (e.g., Black Friday)
- Led cross-functional teams through end-to-end product delivery
- Led QA and UAT processes, coordinating testing strategy to ensure high-quality releases across web and mobile platforms
- Partnered with stakeholders on requirements, demos, and final sign-off

Namecheap – Product Owner | Phoenix, AZ | Nov 2016 - May 2019

Global SaaS & E-commerce • Identity • Payments • Security

- Led two engineering teams – IAM/security (OAuth 2.0, 2FA, PenID) and checkout/payments, supporting 11M+ users globally, focused on conversion optimization and reducing user friction across both modules
- Led migration of IAM and payments from legacy systems to microservices, including as-is analysis, gap analysis, to-be design, and cross-module dependency management
- Led development of mobile applications (iOS and Android) for identity and commerce from concept to launch
- Integrated multiple payment providers including PayPal, Visa, MasterCard, AmEx, and Bitcoin
- Ensured platform stability during high-volume traffic periods (e.g., Black Friday)
- Coordinated cross-functional dependencies and releases across teams
- Facilitated PI Planning sessions and global stakeholder demos (including live-streamed sessions)
- Partnered with Customer Support and UX/UI teams to drive platform improvements
- Led production incident coordination and resolution

Raiffeisen Bank International – Senior Business Analyst | London, UK | Feb 2013 – Nov 2016

Banking • Consumer Lending • Credit Products • Regulatory Platforms

- Led BA team on end-to-end business analysis for credit card and auto loan lifecycle modernization – as-is, gap analysis, to-be design
- Migrated credit workflows to new ERP solution, externalizing business rules from legacy systems
- Translated regulatory and compliance requirements into functional specifications and executable system workflows
- Designed configurable underwriting and compliance workflows across lending and insurance products
- Used SQL extensively for data analysis and validation
- Partnered with Risk, Operations, Engineering, and Compliance to ensure regulatory traceability across credit lifecycle

NetFusion – Product Manager | New York, NY | 2011 – 2013

Startup • CRM • E-commerce • Mobile

- Built CRM and e-commerce platform from scratch with founders – web and mobile (iOS and Android)
- Defined MVP scope, roadmap, wireframes, and backlog, leading delivery through production launch
- Conducted market analysis and stakeholder validation, iterating based on early user feedback

Iridescent (now Technovation) – Business Analyst | California | 2009 – 2011

EdTech • Learning Management System (LMS) • Web & Mobile

- Delivered web and mobile LMS including mobile game for U.S. elementary schools – from requirements through production launch
- Requirements gathering, prototyping, backlog management, and close collaboration with designers and engineering teams
