

Niara (Nia) Mamontova

Product Manager / Product Owner

Irvine, CA (relocation) | niara.mamontova@gmail.com | +1 (814) 852-8918 | [linkedin.com/in/niaramamontova](https://www.linkedin.com/in/niaramamontova) | niaramamontova-prdm.github.io

SUMMARY

Seasoned Product Manager with extensive experience leading complex, enterprise-grade digital platforms across fintech, SaaS, global e-commerce, and regulated financial environments. Delivered large-scale modernization initiatives in identity and account management, pricing, subscription billing, quote-to-cash workflows, AI-driven underwriting, and investment servicing systems. Works at the intersection of business, technology, and data, with a focus on simplifying complex systems, connecting multiple platforms, and improving user experience across internal and external workflows.

Key achievements:

- **Namecheap (~\$300M global SaaS platform):** Led modernization of user management, pricing, and payment services supporting 11M+ users; improved authentication reliability by 30%, reduced payment failure rates by 18%, and strengthened PCI compliance across high-volume global checkout systems; implemented A/B testing for checkout and authentication flows to improve conversion and reduce user friction.
- **On-line Residential (\$1.2M modernization):** Modernized ERP platform and built CRM platform from scratch, integrating subscription pricing, billing, payments (Stripe, PayPal, ACH), analytics, and multi-tenant financial workflows; improved ROI by 25%; defined and executed A/B tests on pricing models and user flows to optimize conversion and customer retention.
- **DXC Technology (Capital Group):** Owned \$1M roadmap for SEC/FINRA-regulated investment servicing platforms, leading AWS migration to improve scalability, operational transparency, and audit readiness.

CORE SKILLS

- **Product Ownership:** Product vision, roadmap development, MVP definition, backlog ownership, prioritization, product scaling, go-to-market readiness, stakeholder alignment, data-driven decision-making, A/B testing, experimentation.
- **Domain Expertise:** FinTech, SaaS, global e-commerce, banking, AI decisioning, onboarding, KYC/KYB/KYM, loan processing, CRM, identity, pricing, payments, subscription billing, quote-to-cash, regulated systems.
- **Technical Expertise:** API integrations (Stripe, PayPal, Experian), Zendesk, Swagger, SQL, Python, AWS-based platforms, Salesforce, pricing and decisioning logic, subscription billing systems, data workflows, ERP/CRM modernization, multi-tenant SaaS, cloud migration.
- **Delivery:** Scrum, SAFe, release management, UAT leadership, CI/CD coordination, incident governance, risk management, KPI dashboards, executive communication, cross-functional collaboration.

EXPERIENCE

Plat.AI – Senior Business Analyst

Los Angeles, CA | Jun 2025 – Nov 2025

FinTech • AI Underwriting • Credit Decisioning • Regulatory Compliance

- Defined product requirements and multi-step decisioning workflows for an AI-driven underwriting platform, translating risk models into scalable system logic.
- Led API integrations in a regulated lending environment, coordinating data exchanges with external financial institutions and credit bureaus; managed partner communication and incident resolution to stabilize automated decision workflows.

DXC Technology (Project: Capital Group) – Product Owner

Irvine, CA | Jun 2024 – Jun 2025

Financial Services • Investment Servicing • CRM Platforms • Cloud Systems

- Owned product roadmap and delivery for SEC/FINRA-regulated investment servicing platforms, aligning compliance requirements with scalable cloud architecture.
- Led AWS migration of legacy CRM and data storage systems in collaboration with architecture and engineering teams, improving system resilience, scalability, and audit transparency.
- Partnered with HR stakeholders to implement internal workflows in Salesforce, supporting operational processes and improving cross-functional efficiency.
- Drove backlog prioritization, release planning, and cross-team coordination across cloud services and operational systems.
- Built KPI dashboards and executive reporting, increasing visibility into delivery progress, risks, and production readiness.

On-line Residential – Product Manager

New York, NY | May 2019 – Apr 2024

B2B/B2C SaaS • ERP/CRM • Multi-Tenant Billing & Payments

- Designed and improved internal business workflows across ERP and CRM systems, reducing manual effort and increasing operational efficiency.
- Integrated multiple systems (billing, CRM, payments) into connected workflows, improving data consistency and reducing context switching for users.
- Built and launched a CRM platform from 0 to 1, defining product structure, core workflows, and leading go-to-market strategy and execution.
- Drove conversion and customer retention by optimizing pricing, onboarding, and payment journeys through data-driven experimentation and A/B testing.
- Improved revenue operations and payment success rates by implementing automated billing, subscription models, and Stripe, PayPal, and ACH integrations.

Namecheap – Product Owner

Phoenix, AZ | Nov 2016 - May 2019

Global SaaS & E-commerce • Identity • Payments • Security

- Improved platform reliability and user experience by redesigning authentication and account management flows, increasing login stability and reducing access-related support tickets.
- Increased conversion rates and reduced user friction through A/B testing and optimization of checkout and authentication experiences based on behavioral data.
- Enhanced scalability and operational efficiency by centralizing user and account management capabilities across web and mobile platforms.
- Improved SLA adherence and reduced production downtime by establishing incident governance practices and strengthening monitoring and reliability processes.

Raiffeisen Bank International – Senior Business Analyst

London, UK | Feb 2013 – Nov 2016

Banking • Consumer Lending • Credit Products • Regulatory Platforms

- Led end-to-end business analysis for modernization of credit card and auto loan processes, including requirements gathering and “as-is”/“to-be” process design.
- Re-engineered lifecycle processes to enable configurable underwriting and compliance workflows, translating requirements into functional specifications and executable solutions.
- Externalized business rules from legacy systems and partnered with Risk, Operations, engineering, and compliance to improve agility and regulatory traceability across the credit lifecycle.

PREVIOUS EXPERIENCE

Early product and business analysis experience across startups and enterprise systems.

- NetFusion (2012 - 2013) – Product Manager: Led delivery of a CRM and e-commerce platform, launching web and mobile applications (iOS/Android) and expanding client adoption.
- PLS Logistics (2011 - 2012) – Senior Business Analyst: Delivered analysis for a logistics ERP platform, supporting shipment tracking, partner workflows, and API integrations.
- Iridescent / Technovation (2009 - 2011) – Business Analyst: Led end-to-end delivery of a web and mobile LMS, from requirements through production launch.
