

Niara (Nia) Mamontova | Technical Program Manager

Irvine, CA (relocation) | niara.mamontova@gmail.com | +1 (814) 852-8918 | [linkedin.com/in/niaramamontova](https://www.linkedin.com/in/niaramamontova) | niaramamontova-prdm.github.io/tpm/

SUMMARY

Technical Program Manager with 10+ years of experience leading cross-functional programs in fintech, SaaS, and consumer platforms. I drive end-to-end delivery by aligning engineering, product, and operations, managing dependencies and risks, and delivering scalable, reliable systems.

Key achievements:

- **Namecheap (~\$300M global web & domain platform):** Led two cross-functional teams delivering IAM and security platforms (OAuth, 2FA) and global account settings for privacy, consent, and user data controls, supporting 11M+ users worldwide.
- **Online Residential (~\$1.2M modernization):** Owned end-to-end re-architecture of legacy platforms into modern .NET/React systems, enabling faster iteration and launching new revenue-generating tools for agents and customers.
- **DXC Technology (Capital Group project):** Owned CRM product workflows and supported AWS migration, improving scalability and release reliability; cloud adoption contributed to ~70% faster disaster-recovery times in testing and faster environment provisioning.

SKILLS

- **Program Leadership:** End-to-end program ownership, 0→1 platform delivery (CRM built from scratch), roadmap execution, cross-team coordination, dependency management, risk mitigation, release planning, stakeholder alignment
- **Technical Delivery:** API integrations (REST, webhooks), distributed systems, cloud platforms (AWS), identity & access (OAuth, 2FA), payments & billing systems (Stripe, PayPal, ACH), data workflows
- **Execution Excellence:** Agile (Scrum, SAFe), backlog management, sprint planning, PI planning, UAT, release management, incident response, production support
- **Data & Analytics:** SQL, data validation, KPI definition, A/B testing, funnel analysis, operational dashboards, performance monitoring
- **Systems & Architecture:** 0->1 CRM platform development, ERP modernization, microservices, Salesforce workflows, system integrations, scalability & reliability improvements
- **Cross-Functional Leadership:** Engineering, Product, Design, Risk, Compliance, Finance, Customer Support, external partners
- **Tools:** Jira, Confluence, Postman, SQL tools, Salesforce, AWS, Zendesk, Swagger

EXPERIENCE

Plat.AI – Senior Business Analyst, Scrum Master

Los Angeles, CA | 2025 – 2025

FinTech • AI Underwriting • Credit Decisioning • Regulatory Compliance

- Coordinated delivery of an AI-driven underwriting platform, aligning engineering, risk, and data teams on multi-step decisioning workflows
- Defined and managed KYC/KYB/KYM onboarding flows, translating regulatory and risk requirements into scalable system logic
- Led API integrations with external financial institutions and credit bureaus (Experian), ensuring reliable data exchange and system stability
- Managed cross-team dependencies and incident resolution, improving consistency of automated approval/decline workflows

DXC Technology – Product Owner

Irvine, CA | 2024 – 2025

Financial Services • Investment Servicing • CRM • Cloud Systems

- Led program delivery for AWS migration of CRM and data platforms, coordinating architecture, engineering, and operations teams
- Managed dependencies, risks, and release readiness across multiple teams, improving delivery predictability and reducing production issues
- Built KPI dashboards and executive reporting, increasing visibility into delivery progress and system health
- Coordinated Salesforce-based workflow implementation with HR and operations teams
- Supported scalability and resilience improvements through structured release and environment planning

On-line Residential – Product Manager

New York, NY | May 2019 – Apr 2024

B2B/B2C SaaS • ERP/CRM • Payments • Multi-tenant Systems

- Led end-to-end program delivery of ERP modernization into scalable SaaS architecture (.NET / React)
- Drove 0->1 development of a CRM platform (web & mobile), defining workflows, system architecture, and cross-system integrations
- Coordinated cross-functional teams across billing, CRM, and payment systems (Stripe, PayPal, ACH)
- Improved payment success rates and operational efficiency by optimizing system integrations and workflows
- Established release processes, incident management, and post-launch monitoring, improving platform stability
- Used analytics and experimentation to improve conversion, retention, and overall system performance

Namecheap – Product Owner

Phoenix, AZ | Nov 2016 - May 2019

Global SaaS Platform • Identity • Payments

- Led delivery of identity and authentication systems (OAuth, 2FA) across web and mobile platforms
- Coordinated cross-functional teams delivering user management and payment systems at global scale (11M+ users)
- Improved authentication reliability (~30%) and reduced payment failure rates (~18%) through system optimization
- Managed release coordination, incident response, and operational readiness across distributed teams
- Partnered with engineering and security teams to improve system scalability and platform stability

Raiffeisen Bank International – Senior Business Analyst

London, UK | Feb 2013 – Nov 2016

Banking • Lending • Regulatory Platforms

- Led business and systems analysis for compliance-driven financial platforms, translating regulatory requirements into delivery-ready workflows
- Coordinated stakeholders across risk, compliance, and engineering teams to support system modernization
- Defined process workflows and KPIs to ensure auditability and regulatory compliance

PREVIOUS EXPERIENCE

Early product and business analysis experience across startups and enterprise systems.

- **NetFusion** (2012 - 2013) – Product Manager: Led delivery of a CRM and e-commerce platform leveraging Shopify, launching web and mobile applications (iOS/Android) and expanding client adoption.
- **PLS Logistics** (2011 - 2012) – Senior Business Analyst: Delivered analysis for a logistics ERP platform, supporting shipment tracking, partner workflows, and API integrations.
- **Iridescent / Technovation** (2009 - 2011) – Business Analyst: Led end-to-end delivery of a web and mobile LMS, from requirements through production launch.
